USDA Proposes Grade Loan Rates For 1979-Crop Flue-Cured Tobacco

Grade loan rates for the 1979 crop of flue-cured tobacco will range from 70 cents to $1.67 per pound under a proposal announced May 21, 1979 by Ray Fitzgerald, Administrator of ASCS. The proposed rates reflect an average support of $1,198 per pound, 8.3 cents per pound above the 1978 level.

The deadline for receiving comments on the proposal is June 22.

Loan rates will be discounted 10 percent for any grade of the primings group (including first quality nondescript) which contain moderately more dirt or sand than normal. Tobacco containing excessive sand of dirt will be graded No-G (no grade).

As in the past, no loans will be available on any tobacco grade No-G, N2 (second quality nondescript, W (doubtful keeping order), U (unsound), or scrap. Marketings of these grades, however, will be charged against the quotas for the farms on which they were produced.

The cooperative associations through which advances are made available will be authorized to deduct one cent per pound to apply against overhead costs.

Comments on the proposed loan rates should be submitted in writing to the Director, Price Support and Loan Division, USDA-ASCS, P.O. Box 2415, Washington, D.C. 20013. Comments will be available for public inspection during regular business hours in the office of the Director, Room 3741 of USDA's South building.

I remind farmers in the county that ASCS is asking all producers to certify to crop acreages again this year.

Participating in the Set-Aside Program you need to certify in order to remain in the program and be eligible for program benefits.

Tobacco producers need to certify acreage in order to be eligible for price support.

Farmers that are not in the Set-Aside Program or are not growing tobacco, but are growing grain are asked to certify so that ASCS records can be kept up to date.

Final reporting dates are: June 30 - Corn, set-aside, fire, flue and sun tobacco. July 15 - grain sorghum and soybeans.

Commodity Credit Corporation Interest Rate On Commodity Loans Increased 2 Percent - The annual interest rate on Commodity Credit Corporation (CCC) loans for 1979 crop commodities will be 9 precent.

The 7 percent rates remain in effect for 1978 crop loans until they are repaid.

The increased CCC interest rate reflects an increase to the CCC in the cost of money that it borrows from the U. S. Department of the Treasury.

Students Practice Teaching & Visit Government Agencies in County

In the first "Year of the Child" activity planned in Appomattox County to recognize the abilities and needs of the county's youth and children, approximately 160 students from Appomattox County School and Middle School visited the county's elementary and primary schools and 23 government related agencies to share experiences with younger children and adults. Students visiting the lower schools participated in teaching activities which included art, music, physical education, foreign languages and reading and helped or observed regular classroom teachers. Students visiting government agencies experienced such diverse activities as traffic court, a polygraph test, a prospective teacher's interview, and in some cases students assisted or assumed the roles of their adult counterparts.

A very special thanks is given to all those students, school personnel, government employees and all others who gave of their time and efforts (on very short notice) to make this day and the experiences successful! Many students and adults have requested that this activity be expanded and become an annual event.

The next suggested IYC activity is recognition of our children's abilities and needs through involving them in Sunday School and church services on Sunday June 10, the day proclaimed in Virginia by Gov. Dalton as **Children's Day** or on some other Sunday that best suits each church's schedule. Dr. William Trimyer has sent a letter to county churches regarding this activity and church leaders are encouraged to make plans for carrying out programs in each church.
